
ENHANCEMENTS

- [ENG-4481] – Removal of IMAP collectors in favor of POP3 collectors
- [ENG-4755] – Removed remainder of IMAP references from UI
- [ENG-4767] – LDAP additional email address query supports filter only on TYPE=SMTP
- [ENG-4768] – LDAP email address query includes addresses discovered and mask creds

BUG FIXES

- [ENG-4290] – Search admins can delete saved search lists
- [ENG-4565] – Resolved issue around legal hold icon not displaying properly
- [ENG-4836] – Predefined tags can be applied to individual emails accordingly

PARTNER API

- [ENG-4731] – Listing a single organization resource JSON through API does not return null in the response body
- [ENG-4732] – “Location” in header response for organization creation includes the UUID for account, and not MySQL ID
- [ENG-4801] – user_email resource accessible for user using UUID

Upcoming release

Our engineering team is working on our next release (tentatively scheduled for mid October 2013). Potential work for that release include:

- Bug fixes around POP3 collection method
- New restriction options around data recovery
- Beta release of Google Postini migration tool
